PROFESSIONAL SUMMARY

Full-stack developer with 5+ years building web, SaaS, AI, and automation systems end to end. Experienced with React, Next.js, Node.js, TypeScript, Express, FastAPI, PostgreSQL, Docker, and API integrations. Built multi-tenant applications, authentication systems, real-time features, and an n8n/AI workflow that reduced manual administration by 85%.

SKILLS

Frontend: React, Next.js, Vue, TypeScript, JavaScript, Tailwind CSS, Zustand, shadcn/ui, Flutter, Riverpod

Backend & APIs: Node.js, Express, Fastify, FastAPI, Python, REST APIs, Payload CMS, Drizzle ORM, Prisma, Laravel, Socket.io

Data: PostgreSQL, MongoDB, MySQL, Redis, BullMQ, Supabase, Firebase, Typesense

AI & Automation: n8n, OpenAI API (GPT, Whisper), Claude, Gemini, RAG, prompt engineering, MCP servers

Integrations: Stripe, Whop, MoMo, Twilio, WhatsApp API (WAHA), Firebase Auth, webhooks

Infrastructure: Docker, Linux, Dokploy, Vercel, Railway, AWS, Azure, Git, Kubernetes (certified essentials)

EXPERIENCE

Independent Full-Stack Developer | Feb 2025 - Present

- Design and build SaaS and AI products for clients and own products, including Anlingo, Noxivo, Luxe Spa Booking, and ChakTech, using TypeScript, React, Next.js, Node.js, and REST APIs.
- Build n8n and AI automation pipelines integrating third-party APIs, reducing manual administrative work by 85% on a live client workflow.
- Architect multi-tenant client systems with APIs and PostgreSQL data models so individual engagements can scale into platforms.
- 4.94/5 across 9 reviews on Freelancer.com, 100% on-time and on-budget, Preferred Freelancer badge (verified Sep 2026).

FoundPeers - Founder | Jul 2026 - Present

- Built the full nine-screen product journey end to end: data model, Supabase authentication with row-level security, state management, and map/discovery layers using Flutter, Riverpod, go_router, and Supabase. Pre-launch; waitlist open at foundpeers.com.

DIGITRENDS - Backend / Full-Stack Developer | Feb 2024 - Feb 2025

- Built and maintained 10+ client sites with authentication systems, REST APIs, and database design; cut page load times by 20% through backend and query optimization.

Base Developpement - CMS Developer | Aug 2021 - Aug 2023

- Built custom WordPress and WooCommerce websites and e-commerce stores.

SELECTED PROJECTS

Luxe Booking Platform (Next.js, Express, PostgreSQL, Prisma, Socket.io, Redis, BullMQ): White-label booking and CRM platform with specialist-aware scheduling, server-side booking validation, a real-time staff inbox, and queue-backed notifications.

Anlingo (Next.js, Express, Firebase Auth, PostgreSQL, Redis, Flutter): Privacy-first AI writing assistant with grammar correction, rewriting, translation, voice dictation, AI chat, multi-provider model routing, billing, and admin controls.

ChakTech (Next.js, Payload CMS, Express, Drizzle, PostgreSQL, Typesense): Client e-commerce platform with hostname-resolved multi-tenant architecture, French/Arabic/English localization, cash-on-delivery checkout, and catalog data migrated from WordPress/WooCommerce.

Adaptifit (Flutter, FastAPI, Google ML Kit, OpenAI, n8n): Client AI fitness app combining real-time pose detection with personalized training and nutrition features; completed for the client but not publicly launched.

AI-Powered Workflow Automation (n8n, OpenAI, Whisper, Google Sheets): Classified Gmail, SMS, and WhatsApp inputs into structured CRM tasks and reduced manual administration by 85%.

EDUCATION & CERTIFICATIONS

RebootKamp (RBK) Tunis - Full Stack JavaScript Bootcamp, Sep 2023 - Feb 2024 | Container & Kubernetes Essentials V2 (Coursera, 2024) | Node and Express Essentials (Coursera, 2024) | Scrum Fundamentals Certified; Scrum for Ops and DevOps Fundamentals Certified (SCRUMstudy, 2024)

Languages: Arabic (native), English (professional)
